Dear Mr. Hagan:

I writing to you to express to you how elated we are with the outcome of your services on the building. Air sealing the building with the Sealection Spray Foam has made a tremendous difference.

After six months of various experts evaluating our building and attempting to offer various solutions, this has been the only viable solution. The quality of air seems better, and we have now been able to regulate and control the air which in turn has saved us money on the utility cost for the practice.

We actually were conducting a Board Meeting the night the crew was there to service the building. Your employees were extremely professional and the next morning there was no trace they had been present.

Thank you for your professionalism, and services rendered to our medical practice.

Regards,

Lynne Marini, CEO
