Coastal Insulation

December 2, 2004

I just wanted to take a minute to let you know how pleased we are with the spray foam insulation. As you know, our 100 year-old house is not well insulated and being off the ground on 3-ft. piers makes the house stay quite cold during the Winter. The spray foam insulation application your crew installed on the bottom of our house (in the crawl space below it) has markedly changed the temperature in the house. We noticed a difference on a very chilly night when we did not need to turn the heat on (or bundle up in sweat pants and jackets). We consider our investment in the spray foam insulation as money well spent and are looking forward to much lower heating bills this Winter. Thanks so much!

Lisa and Ben Ridgdill
